

"Passion+Perseverance"

October 5-8, 2022 • Pasadena, CA

The Future of Energy will be at the 2022 GMiS Conference

Top 5 STEM Careers in Energy

The energy sector has long relied on the most diverse collection of STEM disciplines in all of industry. As the world moves to greener and renewable energy sources, this demand for STEM talent to fill critical positions at top energy companies will only increase.

1. Architectural Manager
2. Petroleum Engineer
3. Chemical Engineer
4. Atmospheric Scientist
5. Materials Engineer

Trends Affecting the Energy Sector Workplace

Industries looking into digitization, especially AI to optimize energy production and infrastructure and minimize waste

More projects looking into efficient production of bioenergy, and practical applications in the world

The Internet of Energy- the decentralization of energy for better distribution and availability, will involve lots of automation

How to Engage Talent at the GMiS Conference

Here are 5 events and programs you can sponsor at the 2022 GMiS Conference that will bring you face to face with next generation STEM talent.

1. Data Analytics Challenge and Cybersecurity Workshops
2. Research Poster Competition
3. Industry-Specific Webinars & Workshops
4. Speed Networking Breakfast
5. All-Day Career Fair
