

2022

GMiS
CONFERENCE

"Passion+Perseverance"

October 5-8, 2022 • Pasadena, CA

The Future of Medicine and Health Science will be at the 2022 **GMiS Conference**

Top 5 STEM fields in Medicine and Health Sciences

Medicine has long been a top career choice for biology and chemistry students, but increasingly engineering students have become high demand. Here are the top five medical areas projected to have the greatest demand for technical talent in the coming years.

1. Remote Patient Monitoring Hardware & Software
2. Artificial Intelligence
3. Digital Therapeutics
4. Augmented and Virtual Reality
5. Robotic Surgery

How STEM Fields are Transforming Healthcare

Industry will look into "innovative technology" to reduce healthcare disparities, especially in underserved communities and rural areas.

Smart watches and other wearable tech will play a greater role in the coming years, as healthcare providers rely on remote monitoring to improve care and diagnose problems.

Artificial Intelligence and the proliferation of personalized medicine will require massive hardware & software upgrades to current systems.

How to Engage Talent at the GMiS Conference

Here are 5 events and programs you can sponsor at the 2022 GMiS Conference that will bring you face-to-face with the next generation of STEM talent.

1. Research Poster Competition
2. GMiS Medical & Health Science Scholarships
3. A.I. Workshops
4. All-Day Career Fair
5. Speed Networking Breakfast
